📍 Vellore, India

PROFESSIONAL SUMMARY

Final-year Computer Science (Data Science) undergraduate seeking an entry-level AI/Software Engineer role. Independently designed, built, and deployed production-grade full-stack **Generative AI applications** end-to-end, including **multi-agent LLM orchestration**, retrieval-augmented generation, and medical AI systems using LangChain, LangGraph, and FastAPI. Strong foundation in data structures, algorithms, and system design; eager to apply hands-on AI engineering experience in a professional team environment.

EDUCATIONS

Vellore Institute of Technology | Vellore

Aug 2023 - May 2027

B.Tech in Computer Science Engineering (Data Science)

CGPA : 8.39 / 10

- Vellore Institute of Technology, B.Tech in Computer Science Engineering (Data Science), CGPA: 8.39 / 10

PROJECTS

MedVision AI — AI-Assisted Chest X-Ray Analysis & Medical Information System | 🌐 Github Jul 2026 - Present

- Developed a full-stack **AI medical assistance system** integrating **8+ technologies** including FastAPI, React, PyTorch, LangGraph, Pinecone, MongoDB, Cloudinary, and OpenAI.
- Integrated DenseNet121 with pretrained TorchXRyVision weights to analyze chest X-rays across **18 pathology categories**.
- Built a **7-stage LangGraph workflow** spanning context loading, query analysis, patient questioning, retrieval, evidence synthesis, and safety validation.
- Implemented a dual-source retrieval pipeline using Pinecone RAG and Tavily to combine stored medical knowledge with external literature.
- Developed conversational patient-context collection supporting **10+ clinical context attributes**, enabling responses grounded in symptoms and medical history.
- Implemented persistent sessions using MongoDB and automated multi-section PDF medical reports using ReportLab.

Technologies / Tools Used : Python, FastAPI, React, PyTorch, TorchXRyVision, LangGraph, GPT-4o-mini, Pinecone, MongoDB, Cloudinary

NeoCode — Full-Stack Coding Practice Platform | 🌐 Github

Oct 2025 - Sep 2026

- Developed a full-stack coding platform** with **10+ REST APIs** for authentication, problem management, code execution, and submission tracking.
- Implemented JWT authentication** with bcrypt password hashing, protecting user-specific resources and managing authenticated sessions.
- Built MongoDB-backed problem** and submission management supporting **20+ coding problems** with solution status, runtime, memory, and language tracking.

Technologies / Tools Used : React.js, Node.js, Express.js, MongoDB, JWT

Wander AI — Multi-Agent AI Travel Planner | 🌐 Github

May 2026 - Jun 2026

- Architected a multi-agent AI travel planning system using **LangGraph**, integrating 5 specialized agents into a single automated itinerary pipeline.
- Built a **FastAPI** backend that integrates 3 external APIs — AviationStack, OpenWeather, and Tavily Search — to provide real-time factual data for LLM outputs.
- Developed a responsive HTML/CSS/JavaScript chat interface with markdown rendering and PDF itinerary export, deployed via Render and Vercel.

Technologies / Tools Used : FastAPI, LangGraph, LangChain, MongoDB Atlas

SKILLS

Databases :	PostgreSQL, MongoDB, MySQL, Pinecone
Frameworks & Libraries :	LangChain, LangGraph, FastAPI, Node.js, Express.js
Programming Languages :	Java, Python, C++, JavaScript
Soft Skills :	Data Structures & Algorithms, DBMS, Object-Oriented Programming, Operating Systems, Computer Networks
Tools & Platforms :	Docker, AWS, Kubernetes, Git, GitHub, VS Code, Postman, n8n

AWARDS & ACHIEVEMENTS

- Solved 500+ questions across LeetCode, GeeksforGeeks, and other coding platforms.
- Independently designed, built, and deployed 3 production-grade full-stack Generative AI applications end-to-end.

CERTIFICATIONS

Generative AI — IBM Career Education Program (Cognitive Class), July 2026
